Fabtec Fabric Display

fabtec

One Person,
one minute...

Fabtec Pop-up is by far one of the fastest and easiest ways to make a good impression.

Fabtec, fits into its own medium sized case on wheels or into a compact travel bag.

Its size and simplicity make it perfect for accompanying you on your flight as a checked bag or even for shipping anywhere in the world you may need it!

If you are looking for a fast and easy solution for your display, Fabtec is the system for you.

The Fabtec is available in 8' and 10' sizes and is only 12" deep. This system is designed with new-age lightweight aluminum as well as a seamless flame resistant graphic that spreads across the entire length of your frame.

The fabric remains on the structure when it is folded and placed into its own travel case. When you are ready to set up the system the tension hooks on the frame stretch the fabric back out to a seamless image!

Setup as easy as 1, 2 & 3

1. Take out the frame with the existing graphic already attached to the frame.
2. Stretch the frame from the centre out
3. Attach the hooks located within the frame and you're finished.
